

Webcourses @UCF Tool	Bloom's Taxonomy	Type of Interaction	Value for Teaching	Value for Learning
Organizational Tools				
Calendar	Remember	Learner-Content Learner-Instructor	Communicates vital course information in an easy to interpret visual format, reducing questions and increasing probability of successful learning outcomes	Provides course information in an easy to interpret visual format, reducing questions and increasing probability of successful learning outcomes
Rubrics	Remember	Learner-Content Learner-Instructor	Communicates vital information about grading in an easy to interpret visual format, reducing questions and increasing probability of successful learning outcomes	Provides course grading information in an easy to interpret visual format, reducing questions and increasing probability of successful learning outcomes
Syllabus	Remember	Learner-Content Learner-Instructor	Communicates vital course information in an easy to interpret and print visual format, reducing questions and increasing probability of successful learning outcomes	Provides course information in an easy to interpret visual format, reducing questions and increasing probability of successful learning outcomes
Communication Tools				
Announcements	Remember	Learner-Content Learner-Instructor	Communicates important course information, reducing questions and increasing probability of successful learning outcomes	Provides to learners course information, reducing questions and increasing probability of successful learning outcomes
Notifications	Remember	Learner-Instructor Learner-Learner	Students are alerted when changes are made to the course, such as an Announcement or grade. If set, students can also receive a notification when you send a message or other direct communication.	Allows students to select how and when they want to be notified when various events occur within a course

Webcourses @UCF Tool	Bloom's Taxonomy	Type of Interaction	Value for Teaching	Value for Learning
Conferences	Apply Analyze	Learner-Instructor Learner-Learner	Have a discussion in real time with web cams and text; share presentations	Provides the real-time, back and forth communication sometimes lacking in an online course
Chat	Remember Understand Apply Analyze	Learner-Instructor Learner-Learner	Encourages learner-learner interaction, creating opportunities for cooperative learning Improves group communication and performance	Offers "live" interaction Creates "live" social learning opportunities Stimulates formation of online learning communities
Collaborations	Understand Apply Analyze Evaluate	Learner-Content Learner-Learner Learner-Instructor	Allows the teacher to see the progression and keep track of ideas and student contributions	Students take an active role in building knowledge together
Discussions	Remember Understand Apply Analyze Evaluate	Learner-Content Learner-Learner Learner-Instructor	Solicits understanding from learners on a specific topic Promotes continuing learner-learner interaction Generates critical thinking and synthesis of ideas Provides "written" documentation of communications	Encourages peer sharing of information and experiences Permits time to contemplate other learners' perceptions and opinions prior to submitting own Creates social learning opportunities, stimulating formation of online learning communities Presents level of knowledge, understanding, and recall of course content

Webcourses @UCF Tool	Bloom's Taxonomy	Type of Interaction	Value for Teaching	Value for Learning
Inbox	Remember Understand	Learner-Instructor Learner-Learner	Facilitates dialogue Provides opportunities to address private comments/ concerns, or controversial issues Gives learner just-in-time feedback	Facilitates communication with instructor or among learners Encourages peer sharing of information and experiences Creates social learning opportunities, stimulating formation of online learning communities
Assessments Tool				
Quizzes; Survey	Remember Understand Apply Analyze Evaluate	Learner-Content Learner-Instructor	Aids in identifying learner skill level and need for additional instruction Checks knowledge, understanding, and recall of course content Means for evaluating course design, delivery, and content Gives feedback to faculty for modification and revisions to course	Informers learners' about additional study necessary to insure knowledge and comprehension Presents level of knowledge, understanding, and recall of course content Offers learners an opportunity to communicate perceptions and experiences
Assignments Tool				
Assignments	Remember Understand Apply Analyze	Learner-Instructor	Provides opportunities for virtual coaching of learners regarding assignment Aids in identifying learner understanding and need for	Facilitates communication with instructors, clarifying expectations Permits time to contemplate instructor's comments prior to re-

Webcourses @UCF Tool	Bloom's Taxonomy	Type of Interaction	Value for Teaching	Value for Learning
	Evaluate		additional instruction Checks knowledge, understanding, and recall of course content	submitting own Informs learners' about additional study necessary to insure knowledge and comprehension Enables learners to demonstrate knowledge and comprehension of course content
Content Tools				
Modules	Remember Understand Apply Analyze Evaluate	Learner-Content	Communicates vital course content in a visual format, increasing probability of successful learning outcomes Can deliver course content, as well as be used to assess learning	Provides course information in a visual format, increasing probability of successful learning outcomes Can enable learners to demonstrate knowledge and comprehension of course content
Pages	Remember Understand Apply Analyze Evaluate	Learner-Content	Editable pages that allow an instructor to add text, images, video and other media	Provides course information in multiple ways
